

## UNIT 2: DYNAMICS &amp; NEWTON'S FIRST LAW · PERIOD 0 HONORS PHYSICS

Orange High School · Physics H  
Inertia Peer Observation Ledger

Date: \_\_\_\_\_

As each classmate performs their live demonstration, record the presenter(s), demo title, and physical category (Rest, Motion, or Direction). In the right column, **explain how you believe the demonstration utilizes inertia to be successful** (explain why the object maintains its state of rest or motion, how the quick action prevents unwanted force transfer, and verify that *no forward force* acts on the mass).

| DEMO & PRESENTER                                                                                    |  | HOW THE DEMONSTRATION UTILIZES INERTIA TO BE SUCCESSFUL                                                                           |  |

HONORS SYNTHESIS: BRIDGING INERTIA TO MECHANICAL EQUILIBRIUM (ΣF = 0)

1. Minimizing Unwanted Force Transfer: Which demonstration observed today achieved the cleanest isolation of inertia? Explain how the presenter minimized contact time (Δt) and friction to prevent unwanted force from disturbing the mass:

2. The Equilibrium Condition: In every demonstration observed today, whenever the mass stayed at rest or moved at constant velocity, what was the horizontal net force acting on that mass? Write the equation: ΣF<sub>x</sub> = \_\_\_\_\_ N. What happens the instant an unbalanced net force acts?
