Part 2: Artillery Physics Strategy (Explain & Sketch) — High Ceiling • 4 Points

1. Fixing a Miss: If your cannonball lands 20 meters SHORT of your target, what is <u>one thing</u> you can change on your next shot to make it reach the fort?

✏️ Sketch: Short Shot vs. Fixed Shot
💣 [Sketch short path vs. hit] 🏰

2. High Arc vs. Flat Laser (Bonus Thinker): Both 35° and 55° can hit the exact same target at the same speed. Which angle stays in the air longer? Why?

✏️ Sketch: 35° Flat vs. 55° High Arc
💣 [Sketch both paths hitting fort] 🏰
